## Error Log Entry

What error message did you encounter (if any)?

`System.out.print("Your age is:" + Ayear, Amonth, Aday);`

Issue 2 showed me "**Syntax error on token ""hours""; delete this token**"

What unexpected behavior did your program exhibit?

Showed me a red line under Hours

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)    Incorrect function usage

Syntax Error

Include a screenshot of specific lines of code.

```
int Ayear = Cyear - Byear;
int Amonth = Cmonth - Bmonth;
int Aday = Cday - Cmonth;

System.out.print("Your age is:" + Ayear, Amonth, Aday);
```

```
int Hours = Days * 8;

System.out.println("You have slept for : " + Hours "hours");
```

How did you fix the issue?

I separeated the whole line into different variables, adding the "years " or months or days in front of the variable.

I added a + after the Variable hours

Provide the corrected code or solution using a screenshot.

```
int Ayear = Cyear - Byear;
int Amonth = Cmonth - Bmonth;
int Aday = Cday - Cmonth;

System.out.print("Your age is: " + Ayear + " years, " + Amonth + " months, and " + Aday + " days");|
```

```
int Hours = Days * 8;

System.out.println("You have slept for : " + Hours + "hours");
```
